

AI Powered Legal Tools Transforming the Practice of Law

Juliette Faraone
Prompt Engineer

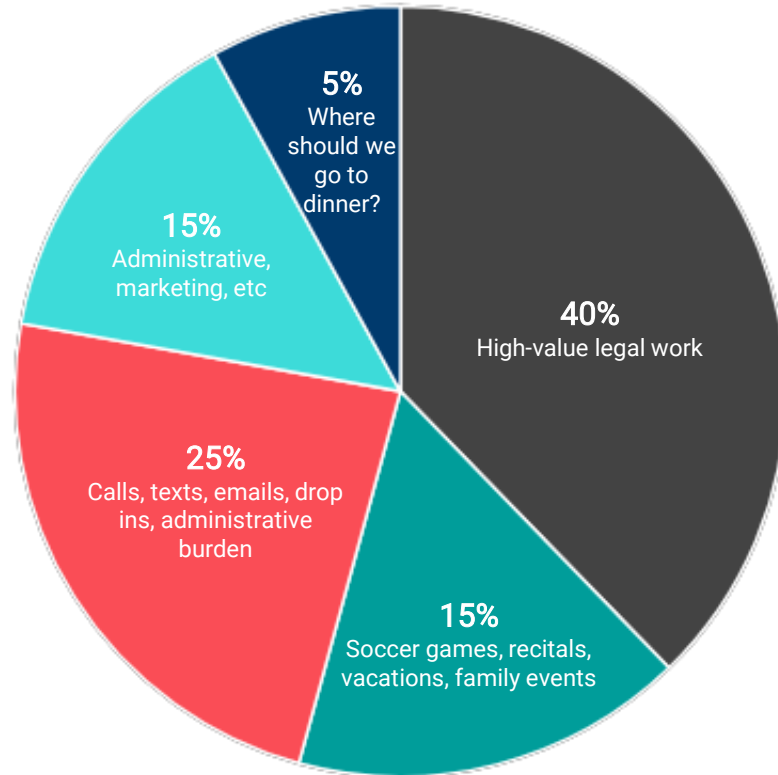

The assumption is that the entirety of an attorney's attention is dedicated to intense legal work

**Reality is that everyone is vying
for an attorney's attention**

Competing priorities erode an attorney's capacity, devastating productivity

Actual Attorney Capacity

**Deep contextual work is the
core of an attorney's output**

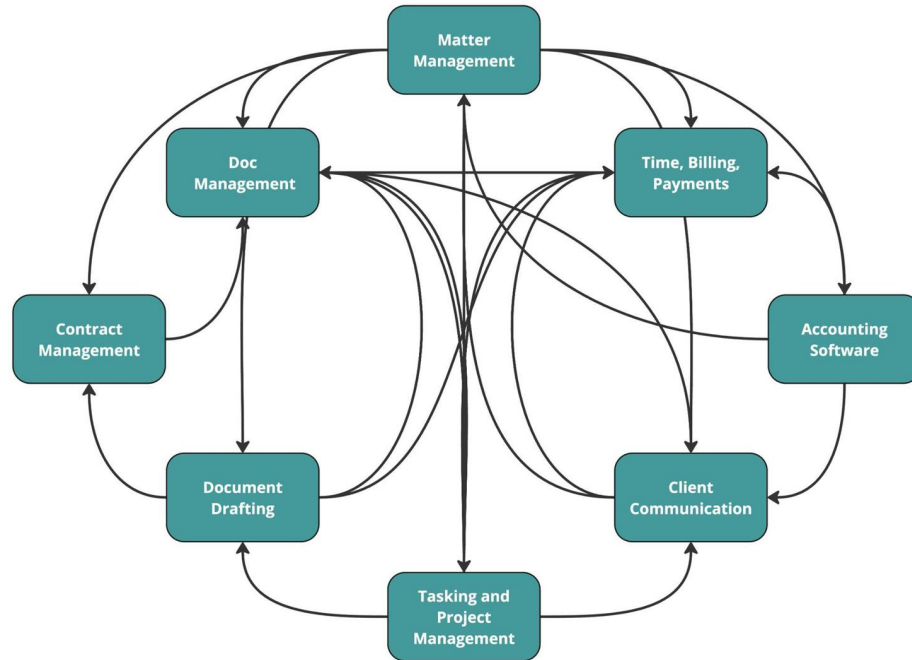

It takes 5 – 15 minutes for an attorney to get into a state of flow where deep contextual work is done

Every interruption restarts the clock

The result is long hours, turnover, burnout, missed deadlines and bad case results

A splintered tech stack forces unnecessary attention shifting and undermines productivity

The solutions?

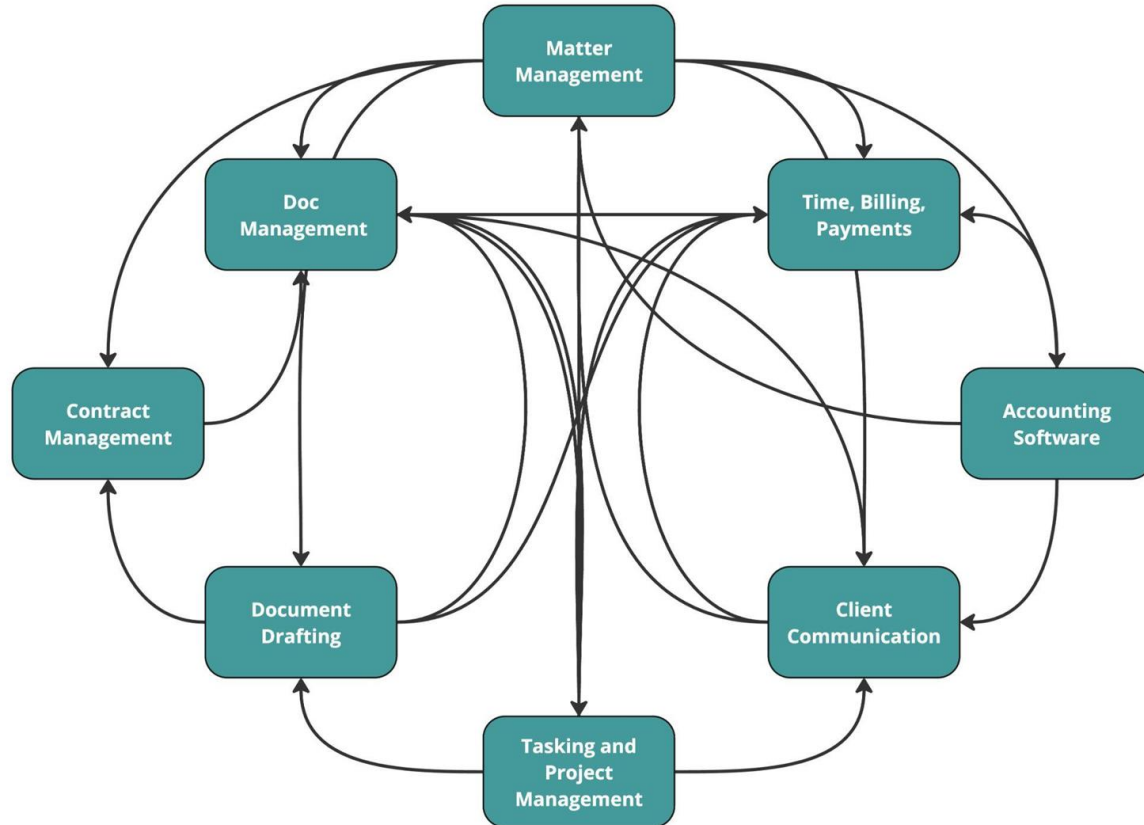

**Change the
culture at work,
home and your
social life**

or

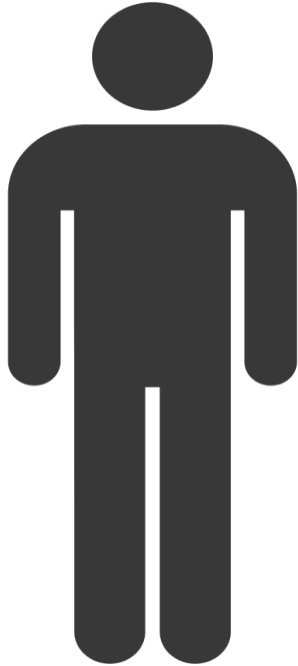

**Incorporate AI into
a unified system
of record to
dramatically
reduce context
and attention
switching**

Where does AI fit in?

Attorney 1

Attorney 2

**Allowing all data to be surfaced
in one place fosters focus and
productivity**

**And enables artificial
intelligence to propel your
productivity even further**
